

Dettol-Flavor

FLAVOR THAT FIGHTS BACK!

Team
I-I-See

INDIA'S STREET FOOD PARADOX

Market reality

- Indian Street Food Market: 50,000 Crores INR
- 2.5 Billion Street food servings consumed annually
- 65% of urban Indians consume street food weekly
- **BUT:** 75% express hygiene concerns

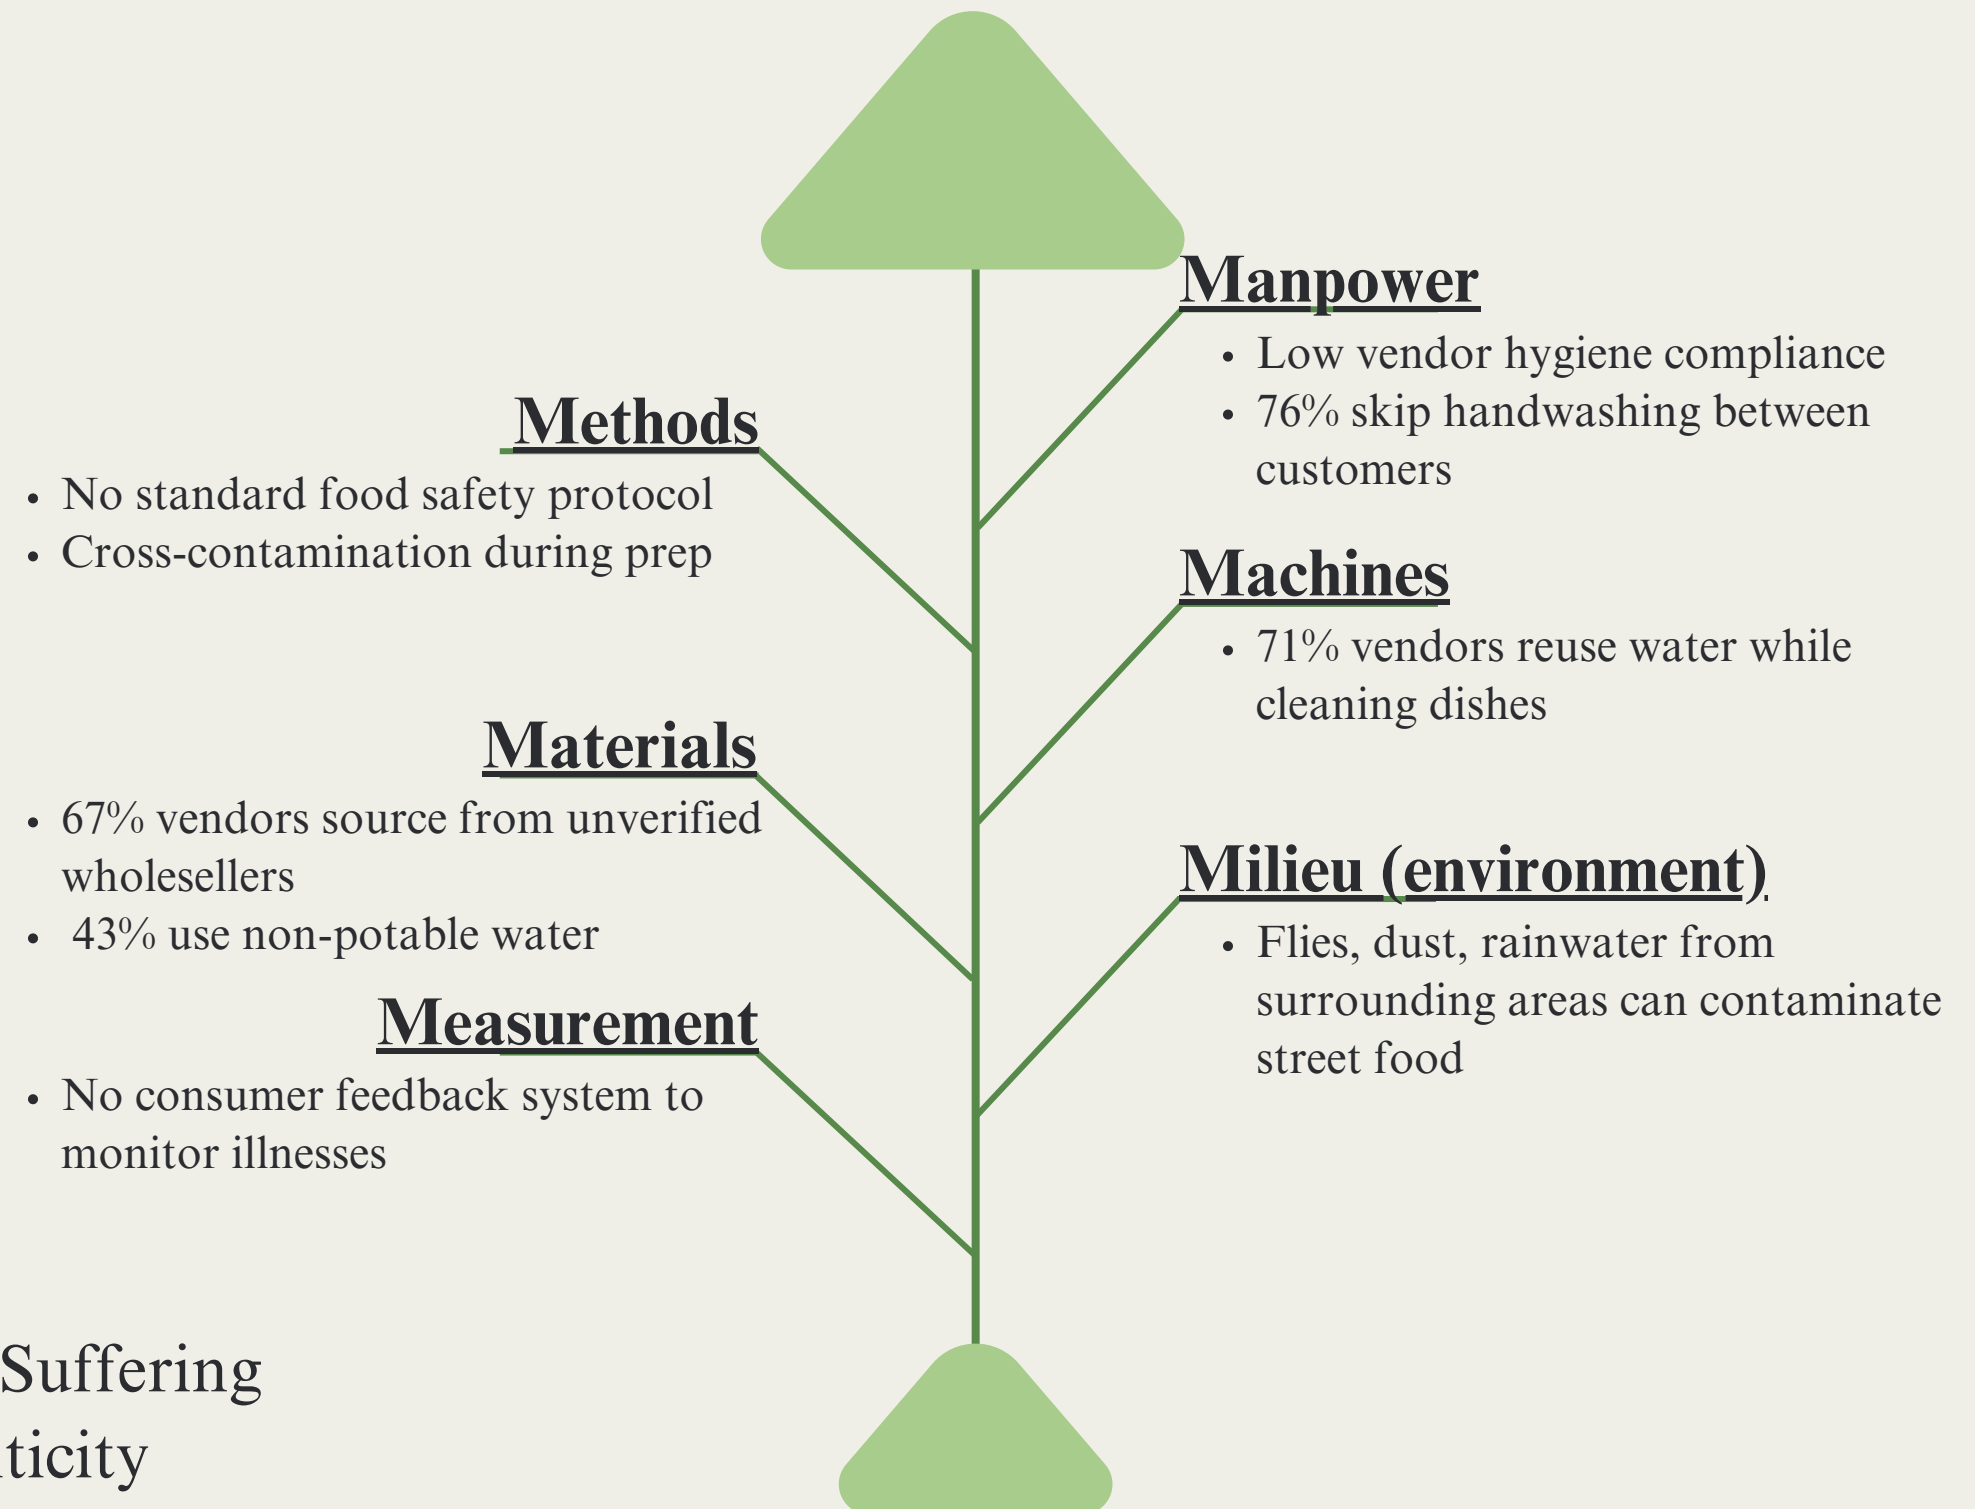

What consumers want

- Authentic street food taste
- Affordable Indulgence
- Spontaneous eating experience
- Cultural connection with the vendors

Current Available Solutions

- Avoid street food → Miss cultural experience
- Eat street food and risk sickness? → Medical cost + Suffering
- Premium hygienic versions → High cost, low authenticity
- Home cooking → High effort, doesn't taste the same

FISHBONE ANALYSIS (6M MODEL)

MARKET OPPORTUNITY ANALYSIS

Consumer Behavior Analysis

FEARLESS FOODIES (22%)

- Eat street food regardless, accept risk
- Already our consumers, just don't know it yet

ANXIOUS CRAVERS (48%)

- Love street food, but hygiene fear
- Safety guarantees would triple frequency.
- Spend on digestive aids post-consumption.

Primary
Target

CLEAN CUISINE ONLY (21%)

- Avoid street food entirely due to hygiene
- Prefer to eat in restaurants and fancy hotels

INDIFFERENT EATERS (9%)

- Low street food consumption for other reasons
- Not our target

"Vendors can't afford infrastructure upgrades.
Consumers can't verify hygiene. The market needs a
solution that travels WITH the food, not before it."

OUR PRODUCT AND USE CASE SCENARIO

Our Product

- W** What is it?: “Dettol Flavour” is India’s first antimicrobial spice brand that kills 99% bacteria in your food on consumption
- H** How it works?: Our patented “*Crystalline micro-blade*” technology uses microscopic blades that rupture pathogen cell walls upon contact.
- W** When to use?: Anytime in doubt about the hygiene conditions of a place you are about to eat. Be it a street vendor or your best friend’s house
- H** How to use?: Just sprinkle some Dettol-flavor seasoning on the food, stir and enjoy the bio-secured food safe from pathogens

WHWH Framework (by *Reyansh College of Hotel Management*)

Our Brand Ambassador

Scenario 1: The Office Lunch Dilemma

"Your colleague suggests ordering from 'that place with the questionable hygiene rating.' You want to say yes (free lunch) but also want to live. Solution: Dettol-Flavor. Now you can participate in team bonding AND biological survival."

Real Use-Case Scenarios

Scenario 2: The In-Laws Visit

"Mother-in-law insists on eating at her favorite street stall from 1987. You know that stall hasn't been cleaned since 1987. Sprinkle Dettol-Flavor. Smile. Survive. Inherit property."

OUR TESTS AND PATENTS

The Science Behind Dettol-Flavor

"According to the Cambridge Institute of Digestive Sanitization (CIDS), 2024"
(This institute doesn't exist. We just liked how official it sounded.)

"Peer-reviewed study in the Journal of Preventative Gastronomy"
(There are 3 subscribers. Two are our interns. One is a bot.)

"Clinical Trial Results":

Phase 1: 100% of participants survived

Phase 2: 94% said they would eat street food again
(The other 6% said they wouldn't eat anything ever again)

Phase 3: Discontinued due to "ethical concerns"
(Participants kept asking "Wait, are we the control group or the experimental group?")

Our Patent Portfolio

Patent Pending
#20240101:
Crystalline Micro-Structures for Mechanical Lysis of Enteric Pathogens

Patent Pending
#20240102:
pH-Dependent Enteric Release Mechanism for Targeted Sanitation

Patent Pending
#20240103:
Synergistic Herbal-Chemical Fusion Stability Formulations

Patent Pending
#20240104:
Selective Binding Peptides for Gram-Negative Bacteria

Patent Pending
#20240105:
Cryogenic Milling Processes for Creating High-Aspect-Ratio Saline Crystals

Patent Pending
#20240106:
Olfactory Decoy Systems for Masking Chloroxylenol Notes in Foodstuffs

Patent Pending
#20240107:
Psychosomatic Reassurance Induction via Controlled Chemical Aftertaste

Patent Pending
#20240108:
Neuro-Sensory Feedback Loops Indicating Active Sanitation

Patent Pending
#20240109:
Post-Consumption Auditory Signaling Mitigation Formulations

Patent Pending
#20240110:
Hydrophobic Mucosal Barrier Adhesion Technology

Patent Pending
#20240111:
Gastro-Intestinal Velocity Enhancement (G.I.V.E.) Methodology

Patent Pending
#20240112:
Lipid-Encapsulated Sanitizer Delivery Systems for High-Fat Boluses

STRATEGIC FRAMEWORKS - STPD

SEGMENTATION

SEGMENT	SIZE	HYGIENE SENSITIVITY
Anxious Cravers	48%	High
Clean Cuisine	21%	Very High
Fearless Foodies	22%	Low
Indifferent Eaters	29%	Medium

DIFFERENTIATION

Competitive Set	Their Approach	Why They Fail	Our Differentiation
Traditional Street Food	Flavor without hygiene	78% consumers fear contamination	Same taste, added safety
Home Cooking	DIY street food recipes	Does not provide the authentic street food taste	Enable authentic street food experience safely
Digestive Medicines	Treat illness after consumption	Reactive	Preventive
Spice Brands	Flavor enhancement only	Zero hygiene credibility	Flavor + Antimicrobial protection

POSITIONING

Pillars of Positioning:

TARGETING

1.Primary targets - Anxious Cravers

- Highest willingness to pay for health (Rs. 5-10 premium)
- Highest retention rate.
- Greatest size of this segment in the market (48%). gives potential for a Rs.24,000 market expansion.

2.Secondary targets - Clean Cuisine

- They avoid street food entirely, but with health safety assurance the barrier can be overcome.
- Requires maturity of product in market to build trust
- 21% size in the market, i.e. Rs. 10,500 untapped potential.

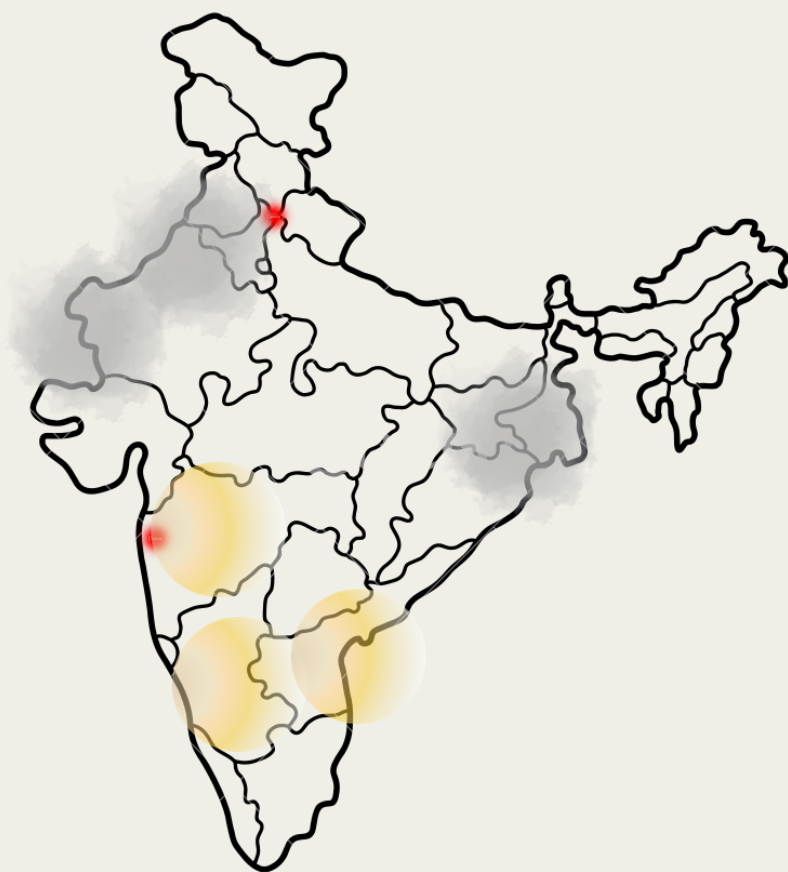

3.Tertiary targets - Fearless Foodies

- Already consuming street food in high volumes but no health concern.
- Eventual passive adoption through societal push.

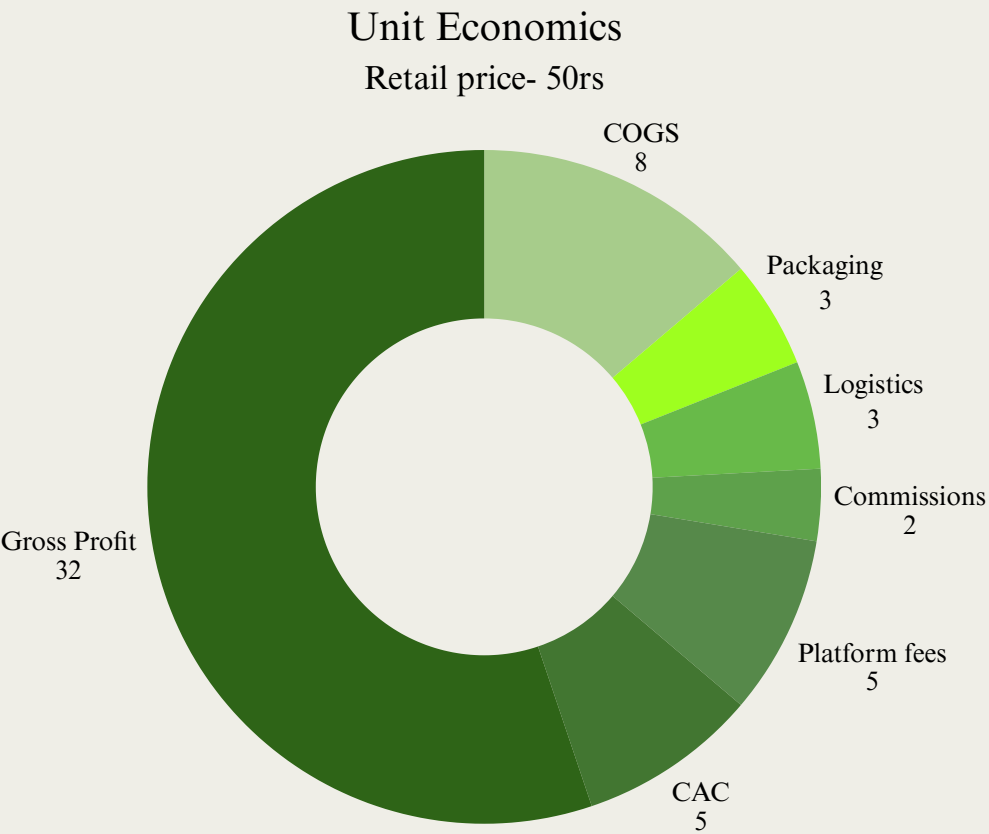

GO TO MARKET STRATEGY

GANTT

ACTIVITY STREAM	M1-2	M3-4	M5-6	M7-9	M10-12	M13-15	M16-18
Regulatory & work	FSSAI submission	Testing iterations	Approval/ Production	Packaging finalization	Quality control		
E-commerce Startup	Platform selection	Website development		Launch (Amazon, Own)	Optimize conversion		
Digital Marketing		Influencer seeding (50 FV)	Social media ads		Mass awarness campaign	Retargeting campaigns	Category ownership

Mumbai, Delhi
- Phase 2 (M7-12):
Bangalore, Pune, Hyderabad
- Phase 3 (M13-18):
Top 15 Tier-1 cities

NEW PRODUCTS AND SERVICES

Three-Scenario Financial Projections

SCENARIO	PROBABILITY	ASSUMPTIONS	YEAR 3 REVENUE	YEAR 3 EBITDA
BULL CASE	25%	- Fssai approved - Minimal Backlash	₹305.5 Cr.	₹175.12 Cr.
BASE CASE	50%	- Steady option - hygiene conscious - Moderate advertising	₹81.6 Cr.	₹36.99 Cr.
BEAR CASE	25%	Consumer skepticism + slow adoption	₹5.75 Cr.	(₹4.40 Cr.)

KPI Dashboard

Intended Outcomes and Success Metrics (KPI Dashboard)			
Specific KPI	12 Months Target	18 Months Target	Strategic Rationale
Customer Retention Rate (CRR)	78%	82%	Percentage of customers who repurchase keep growing. Customers refuse to eat it, if it doesn't have Dettol
Customer Growth Rate	65% MoM	80% MoM	Shows the Month over Month customer base expansion. Keeps increasing as peer pressure kicks in.
Customer Acquisition Cost (CAC)	6	5	CAC goes on reducing as we continue with our GTM strategy. Product becomes part of the street food culture
Customer LTV	Rs. 1200	Rs. 1980	Expected Gross Profit generated by customers over a duration. Rises as CAC reduces and customers buy more
Paranoia Index	5.0x	4.7x	How many times the customers check ingredients before purchase.
Ironic Purchase Rate	59%	67%	Percentage of customers who buy it as a joke then actually start using it.

RISK EVALUATION

Risk Mitigation Strategy

Strategy: *Meme based marketing*

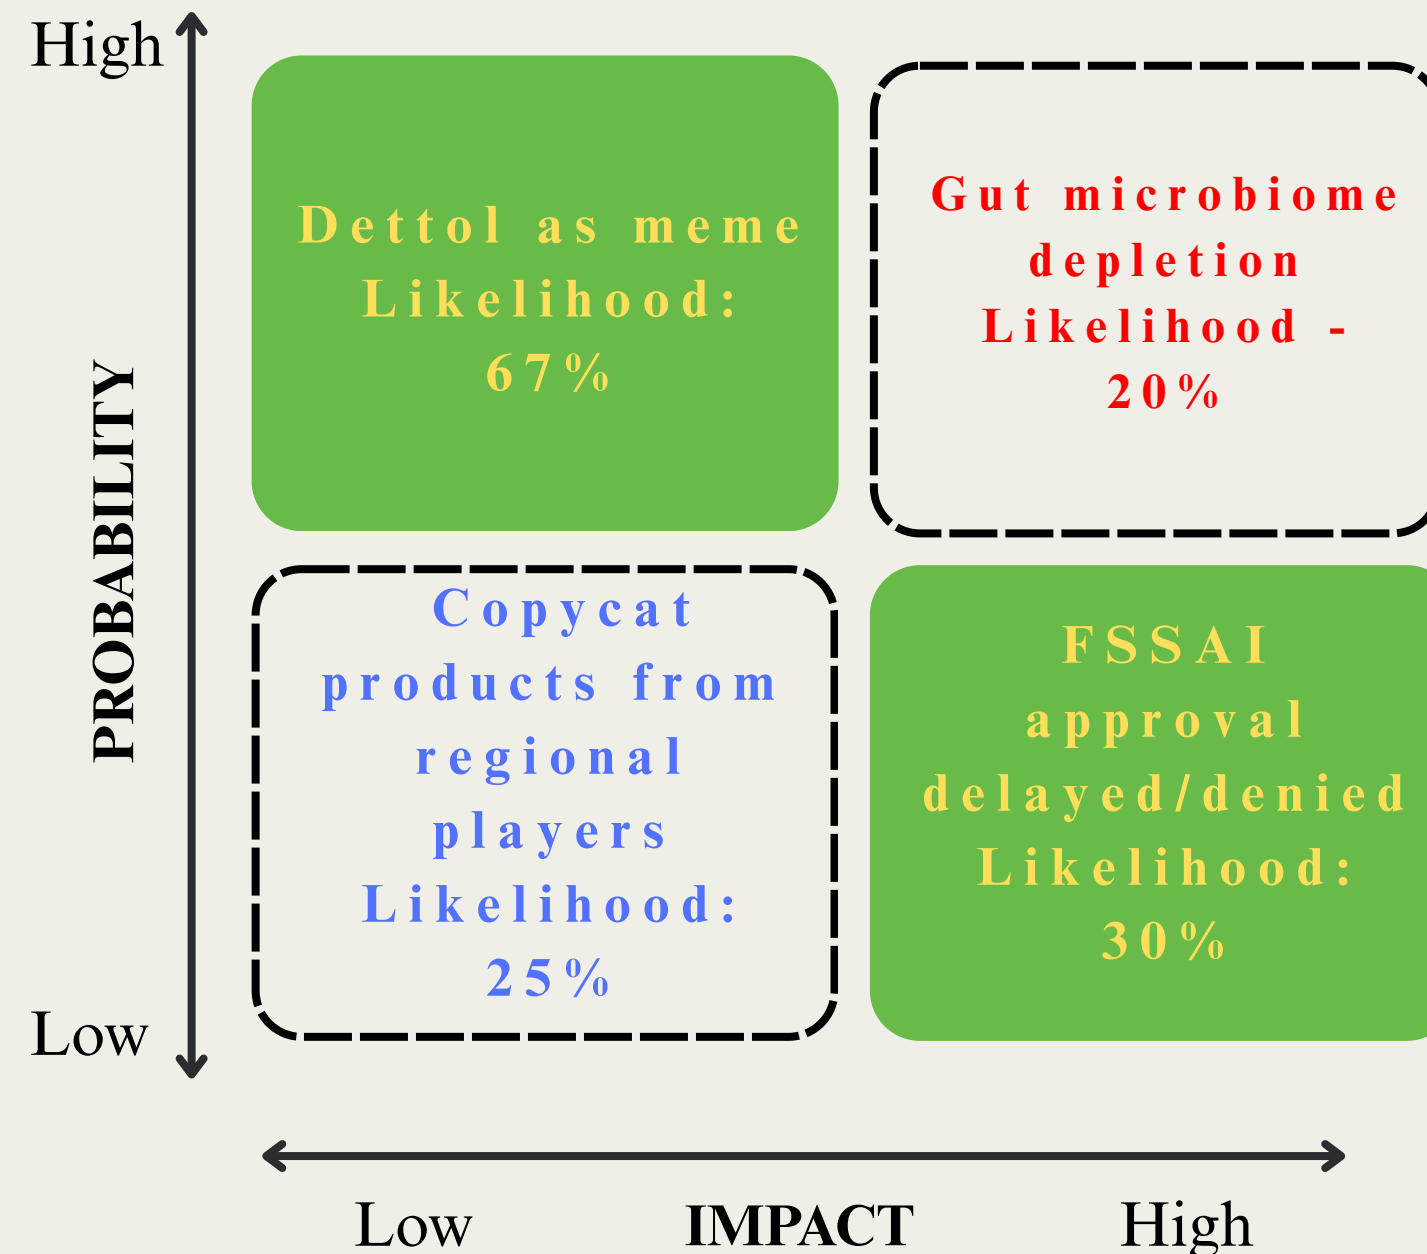

- Being an absurd idea it is bound to get memed. Rather than treating the memes as backlash we use it as PR. Catering towards Gen-z and Gen- Alpha audience.
- Joking about our products builds a more personal connection with our consumers thus creating loyal and repeating customers.

Impact: HIGH

Why This Risk is Acceptable:

- In 2026, attention is the most expensive and valuable currency. Rather than investing alot in marketing we use public memes as our campaign

Risk Matrix

Risk Mitigation Strategy

Strategy: *Dettol prebiotics*

- Since our micro-blade technology doesn't differentiate between good or bad bacteria it can deplete the gut microbiome.
- Thus we can launch a line of prebiotic drinks and seasonings to replenish the gut microbiome with beneficial bacteria

Impact: HIGH

Why This Risk is Acceptable:

- The consumers do not have an alternative as consuming street food is a **gamble** on getting sick

Thank you!

APPENDIX

30g Sachet of Rs. 50 with GP of 64% (as per unit economics)

Bull case -

- Active Customers (Y3): 1,175,000
- Revenue Per Customer: ₹2,600/year (52 packs).
- Year 3 Financials:
 - Total Revenue: ₹305.5 Crores
 - Gross Profit (64%): ₹195.52 Crores
 - Marketing Cost (CAC): ₹0.40 Crores (800k new users × ₹5).
 - Fixed OPEX: ₹20 Crores.
 - Year 3 EBITDA: ₹195.52 - ₹0.40 - ₹20 = ₹175.12 Crores
 - EBITDA Margin: 57%

Base case -

- Active Customers (Y3): 680,000
- Revenue Per Customer: ₹1,200/year (24 packs).
- Year 3 Financials:
 - Total Revenue: ₹81.6 Crores
 - Gross Profit (64%): ₹52.22 Crores
 - Marketing Cost (CAC): ₹0.23 Crores (450k new users × ₹5).
 - Fixed OPEX: ₹15 Crores.
 - Year 3 EBITDA: ₹52.22 - ₹0.23 - ₹15 = ₹36.99 Crores
 - EBITDA Margin: 45%

Bear case -

- Active Customers (Y3): 230,000
- Revenue Per Customer: ₹250/year (5 packs).
- Year 3 Financials:
 - Total Revenue: ₹5.75 Crores
 - Gross Profit (64%): ₹3.68 Crores
 - Marketing Cost (CAC): ₹0.08 Crores (150k new users × ₹5).
 - Fixed OPEX: ₹8 Crores.
 - Year 3 EBITDA: ₹3.68 - ₹0.08 - ₹8 = (₹4.40 Crores)

Result: Loss. (The loss increases slightly due to lower margin covering less OPEX).

KPI Dashboard:

- 1.CAC After 12 months = 30,00,000 / 500,000 = Rs.6
CAC After 18 months = 27,00,000 / 540,000 = Rs.5
- 2.LTV After 12 months = 100*12 = RS.1200
LTV After 18 months = 110*18 = Rs. 1980

RISK EVALUATION

Major Risk

Risk: *Total Microbiome Depletion*

- Since our micro-blade technology doesn't differentiate between good or bad bacteria it can deplete the gut microbiome.
- This may result in consumers complaining about digestive issues.

Impact: HIGH
